PROFESSIONAL SUMMARY

Passionate and creative Game Developer with experience in Unity game development, gameplay programming, and interactive technology projects. Skilled in developing game mechanics, player interaction systems, UI implementation, debugging, and optimization using C# and Unity Engine. Experienced in collaborative team environments through participation in robotics, AI, and international innovation competitions. Strong problem-solving mindset with the ability to quickly learn and adapt to new technologies while building engaging and user-focused gaming experiences.

WORK EXPERIENCE

Interactive STEM Mini Game System Development Unity • C# • UI System

03/2025 – 08/2025

- Designed gameplay systems for interactive mini games used in technology events.
- Developed UI systems, animations, and visual effects in Unity.
- Implemented mission, scoring, and player interaction systems.
- Optimized game performance and fixed gameplay-related bugs.
- Collaborated with teams to deploy live demos during STEM events.

Personal 2D Platformer Game Development Unity • C#

09/2024 – 12/2024

- Developed a 2D platformer game using Unity Engine.
- Built player movement, jumping, and collision systems.
- Designed levels, basic enemy AI, and checkpoint systems.
- Integrated animations and audio systems into gameplay.
- Improved gameplay experience through testing and optimization.

SKILL

Technical Skills

- Unity Engine
- C#
- Gameplay Programming
- UI/UX Development
- Game Mechanics Design
- Debugging & Optimization
- Git/GitHub
- Firebase
- REST API
- MongoDB
- Basic AI Systems

Programming Languages

- C#
- JavaScript
- Python
- HTML/CSS/Tailwind
- SQL
- Flutter

PROJECTS & ACHIEVEMENTS

Food Connection App – Surplus Food Sharing Platform

Food Connection App – Surplus Food Sharing Platform

Food Connection is an application that connects surplus food donors with users in need while providing transparent tracking of food inspection and preservation processes. The platform aims to reduce food waste, protect the environment, and promote sustainable food sharing within communities.

Responsibilities

- Developed the application using Flutter and managed data using MongoDB for flexible scalability.
- Integrated Google Maps API for location services, route tracking, and food delivery management.

09/2023

-

10/2023

Dong Nai Digital Transformation Competition 2023

Champion Award

“Your Voice” – AI Application for Detecting Hate Speech in Vietnamese

Developed an AI-based application capable of analyzing emotions and identifying toxic or hateful content in Vietnamese comments, while also building a community platform for safer and healthier online communication.

Responsibilities

- Developed the application interface using Flutter.
- Applied Machine Learning models such as CNN and LSTM for image and text classification using Vietnamese datasets optimized for the system.

06/2025

Expanded Student Science Conference

Champion Award

11/2025

Ministry of Education Competition

Encouragement Award

Borderwave – Border Alert & Student Support System

Borderwave is a system designed to support border-area students by tracking border situations, providing risk warnings, and enabling rapid response during emergencies. The system also offers digital maps, geographical information, and real-time notifications to support educational activities and community safety.

Responsibilities

- Developed the application interface using Flutter and built the website using NextJS.
- Converted GIS map data from Excel and JSON into a map system for student support.

06/2025

Vung Tau Technical Science Competition 2025

First Prize

“Generation Z Students” Competition – VTV3

Encouragement Award

OTHER ACHIEVEMENTS

Encouragement Award & Final Round Encouragement Prize

- Used LiDAR technology for autonomous vehicle navigation and object recognition.
- Applied computer vision algorithms for obstacle detection and handling in real-time environments.

Third Prize

- Designed and developed a smart management system for tracking activities and resource management within educational organizations.
- Built a data collection and analysis system for organizational members and provided real-time reporting features.
- Entire project developed using NextJS.

National RoboG Competition 2024

01/2024 - 09/2024

Dong Nai Provincial Hackathon 2024

11/2024
